THE PROPER CARE OF YOUR AUTOMOBILE Two Methods of Polishing

It has been told how the color and lustre of your automobile can be restored by the use of a properly formulated polish. There are two accepted methods of polishing, the one by using a combination cleaner and polish of the liquid type, and the other by using a cleaner and wax.

While the use of the liquid polish is less work, and will restore the lustre to your car in one operation, it doesn't last long and won't prevent further weathering.

The second method involves two operations, and while harder work, will preserve the finish for months. The traffic film must first be cleaned off with a mild abrasive polish or cleaner. When the finish is thoroughly dry and clean, the polishing wax is applied with a ball of soft cloth which has been damp-

ened and wrung "dry." The wax should be put on sparingly, rubbing it into small sections (not more than two or three square feet) at a time. Then the wax is rubbed up to a bright lustre with a clean dry cloth.

Wax, like window glass, has the ability to filter out the ultra-violet rays of the sun. When you wax your car, you apply a thin transparent film over the entire surface which, in addition to improving its appearance, protects the finish from weathering. It is easier, also, to keep the waxed surface clean as dust and dirt can be wiped off much easier.

If given this attention a car will retain its good looks for years, and its finish will last a remarkably long time.

A LOCAL POPULAR YOUNG MAN WEDS.

At Grace Lutheran Parsonage, Jasper Ave., Edmonton, a quiet wedding was solemnized on Thursday, Sept. 20, when Miss Lucille Dorothy Hawkins, daughter of Mr. and Mrs. Wm. Hawkins, of Edmonton, was united in the bonds of wedlock with Mr. John Philip Miller, Postmaster at Stony Plain. Mr. William Miller and Mr. and Mrs. Samuel Zucht witnessed the ceremony. The marriage rite was performed by Rev. H. J. Boettcher, pastor of Grace Lutheran church.

The Newlyweds returned on Monday from a honeymoon spent at Banff, and have taken up their residence on Strauss avenue.

Goose Hunters Go North.

Mr. Otto Hoffman and Mr. Jac McCulla left on Monday for a hunting trip up in the Berwyn district. They have gone up by train, and expect to be away a week, or so soon as they get their quota of geese, the latter being what the pair is after. They had been receiving very encouraging reports from a friend of theirs up in that district regarding the prospect of knocking over the feathered honkers. Berwyn is the town where Mr. S. C. Elliot is manager of the Bank of Commerce branch. Mr. H. will find on his return a long list of friends who have their names down to receive a wild goose.

At the Talks.

Mr. Goodman's presentation on Thurs. Evening, Tom Keene in "Partners," was of the good old Western type—plenty cowboy, plenty of hard riding, plenty lariat. The film was highly appreciated by the younger element present. The other picture, "Music Box," with its highly diverting situations, came in for a good measure of applause. Mr. Goodman is not putting on a show this week, owing to the fact that the film "Naedchen in Uniform" will be shown the following night, the 28th, at Kelly's Hall.

Obituary.

The death occurred Tues., Sept. 18, of John J. Goetzinger, at the home of his parents, Mr. and Mrs. Peter Goetzinger, in the Blueberry district. Deceased was in his fourth year. Funeral took place on Thurs., Sept. 20th. Services were conducted by Rev. H. Kuring, pastor of St. John's Lutheran church, Blueberry. Interment was made in the St. John churchyard.
John Armbruster was in charge of the funeral arrangement.

"Fresh from the Gardens"

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday toils and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the incultation and development of character which recognizes and insists upon fairplay, respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to skill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly "trained experts" "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" may be a native son or even a resident of the home city, but imported men from anywhere simply because they have the knack to excel in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized to the nth degree to make money for the franchise and the high-salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money-grabbing instinct of men. Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the admiration and ultimate enrolment of youth from all over the country. It is no longer sport in its true sense, but a business proposition with such institutions.

With but few exceptions, people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place, and a big place, in the physical, mental and moral development of youth. But it is being perverted to gross material ends, with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is true a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Fall rye in Canada, as at August 30, 1934, shows a yield of 5,339,000 bushels from 587,100 acres, compared with 3,454,000 bushels from 434,900 acres in 1933.

The number of sheep in New Zealand and as shown by the returns on April 30, 1934 was 28,550,770 an increase of 800,000 compared with the corresponding date in 1933.

Looseness Of The Bowels During The Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels, which develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 38 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. Milburn Co. Ltd., Toronto, Ont.

Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the doughty West of England colliers who conducted him round the mine.

Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole."

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay in the prince's lucky estate.

The prince lent a sympathetic ear to the colliers' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The men set to work. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paying for itself. Fifty men are in full-time employment; one hundred and thirty-five tons of household coal are raised every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal welcome from the black-faced colliers.

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared, his hands black from the low corridors where he had bent almost double.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he would never work again. Read what he says:—

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work again. I am working harder than a young man to-day. Thanks, many thanks to Kruschen. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours a day sometimes. Kruschen Salts have done it—G. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are in travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-tailored young man in brown soft hat and brown shoes was exploring an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage—or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada. Hon. George H. Sedgewick, chairman of Canadian tariff board declared before the maritime conference on Canadian affairs held at Halifax.

Of 35,500 insured workmen in Luton, England, only 700 are out of work.

Cook's Home Rebuilt In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 253 boxes and transported by 25 lorries, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as one witness remarked. Stones for the walls, dugstons for the floor, joists, rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be much use for hammering in, but interesting as showing the type used.

The ivy alone will not be replaced in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of disease. In exchange for the cottage, Cook's birthplace, Great Ayton, Yorks, is to possess a stone obelisk modelled on the monument commemorating his discovery of Cape Everard.

Lignite Coal

Development Of Coal Field In Saskatchewan Carried On Successfully

Development of high moisture lignite deposits in southern Saskatchewan, which are located a considerable distance to the east of other fuel sources of Western Canada, has been carried on successfully throughout the depression years, R. L. Sutherland, consulting engineer for the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years when the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel.

Skating Rink On Glacier

James Simpson, guide, naturalist and artist, has scraped smooth the surface of a glacier lying between two mountains near Banff, Alberta, to make a summer skating rink for his husky daughters, Mary and Margaret. He said skating on glaciers will be common in a few years.

Roman coins were minted in the temple of Juno.

SUNDAY SCHOOL LESSON

REVIEW: GOD IN HEBREW HISTORY

Golden text: "Thy kingdom is an everlasting kingdom." Psalm 145:13. Devotional reading: Hebrews 11: 32-40.

A Review By Means Of Allusions To What Does Each Allusion Refer?

"And the might of the Gentile, unsmote by the sword, Hath melted like snow in the glance of the Lord.—Byron.

Up, Christians, leave your caves and do!—F. B. Meyer.

Let each one ask himself whether he is seeking to please God by doing justly, loving mercy, and walking humbly before him; whether he is on the side of God and of the things which are pleasing in God's sight.—Broden P. Bowne.

"With the cords of a man Jesus is drawing men; in the bands of love he is binding the world together."

When the brook dries up, the word of the Lord often comes to men. When he withdraws his gifts it is that they may see himself.—J. Stuart Holden.

"There is much splendid work of this kind done by the Friends. But it is likely to be missed by those who despair of the Kingdom of God. There are a host who have not bowed the knees to Baal."

What asks our Father of his children, save A reasonable service of good deeds.

Pure living, tenderness to human needs, Reverence and trust, and prayer for light to see.

The Master's footprints in our daily ways?—Whittier.

I see the oil of thy Word will never leave increasing whilst any bring an empty barrel.—Thomas Fuller.

"Let justice, unimpeded by avarice of selfishness or cruelty, roll down as waters."

In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; a decrease of 70,000 acres or 2.3 per cent. in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent., and rye also increased by 149,300 acres, or 28.7 per cent.

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, tides them over Change of Life... makes life seem worth living again.

At the Mercy of Financiers.

Editor Willis, in *The Stettler Independent*: "Two or three years ago the Government of Alberta floated a loan of ten million dollars at 7 p.c. The government did not ask the people of Alberta to subscribe to that loan. It went to the money barons of eastern Canada and got the money at the highest rate ever charged a province in Canada. Ex-premier Brownlee and Prov. Treasurer Reid did not go up and down the country telling people the Province was being held up by financial bandits. They said not a word about the matter.

I don't know why it is, but ever since the present Government has been in power in Edmonton—a Government elected by the farmers for the benefit of a long-suffering class, it seems to have been at the mercy of the financial interests of Toronto, Montreal and New York. No member of the Government has ever got up and told the financial interests where they got off at.

The Surest-footed Animal

Goats, moose and elk are known to possess marvelous bodily balance and an uncanny accuracy in the placement of their feet; but the popular impression that they never fall from the dizzy heights to which they often climb is erroneous. I have personally known both moose and elk to die from such falls.

The mountain goat is the surest-footed of all, and the most intelligent in meeting certain emergencies that arise on narrow trails. When two goats meet on an extremely narrow ridge with a precipice on each side, coolness and intelligence are indispensable. They cannot pass, nor retreat, as there is no room in which to turn about.

Under these circumstances, the goats stand and look at each other thoughtfully for some time and finally discuss matters. Then one of them kneels and lies down very carefully, and the other deliberately walks over him. They never get rattled and lose their heads. You will always find that any species of animal is about as clever as any other in this particular line of business which concerns its existence.

A FURTHER STEP on the Road to Recovery

A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programme—and of the 1934 Loan as part of it—cannot be over-emphasized. It is important from three aspects: 1—National Credit; 2—National Economy; 3—National Recovery. I shall deal with each of these in turn.

1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met, fully and promptly, as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining our credit. By this programme Canada has already refunded \$58,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3½% and, in New York, obtained a one-year loan of \$50,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its issue price. The twelve-year 4½ Bonds of the 1933 Refunding Loan, issued at 96½, are now selling at 104 to yield approximately 3½%.

2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$9,000,000 per annum, and completion of the 1934 Loan will provide a further saving of over \$5,000,000 per annum.

The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every tax-payer. This saving has much more than offset the interest charges on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burdens which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving consistently upward in an improvement so marked and so consistently sustained that we need no longer doubt its reality.

The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, carloadings, electric power production, employment and prices. Here is the record in each case:

	During Past Year	Since Low Point of Depression February 1933
Physical volume of business.....	13.9%	42.8%
Industrial Production.....	15.7%	56.9%
Carloadings.....	10.3%	29.4%
Electric Power Production.....	12.4%	32.7%
Employment.....	14.7%	17.1%
Wholesale Prices.....	4.0%	13.7%
Farm Products Prices.....	7.7%	43.3%

*The case of carloadings, employment and prices, the latest figures available are those for August; in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately \$99,000,000, or 32.7% over the same period last year. The corresponding increase for imports has been slightly under \$93,000,000, or 38.2%.

A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

P. B. Bennett
PRIME MINISTER OF CANADA

DOMINION OF CANADA 1934 REFUNDING LOAN

It Happened on the Ocean.

Bridget O'Flaherty had a recommendation written for her before leaving Ireland to come to Canada. On the way over this paper was lost, and she appealed to a Mr. Rafferty, a fellow passenger, who penned the following document—

"To All Whom It May Concern: Bridget O'Flaherty had a good reputation in Ireland, but lost it on the way over."

EUROPE BOUN ? Sail Canadian Pacific.

Anyone who has ever sailed on a palatial Canadian Pacific Liner tells . . . of luxury and service fit for a king . . . of excellent cuisine . . . of congenial shipboard companions . . . of a trip free from care, filled with pleasure and comfort.

Full Information and Literature from
R. W. GREENE, - C.P.R. Building, Edmonton.

Vegetables for Drouth-stricken Areas.

Appeal for donations of vegetables from districts having an abundance of these to be shipped to the relief areas of the province is made. Local organisations—boards of trade or church societies—are asked to supervise the collection and loading of these, to be made up in carlots. Some 50 carloads of such supplies are needed, to serve about 3000 families.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost inestimable benefit to Canada. Billions of dollars of American money has been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. The fact that the confidence of the world in which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of people who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without inciting those conditions of the mind or of the body politic, which lead to war.

Probe Working Of The Brain

Use High Radio Currents To Stop Functioning Of Limited Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department. Dr. Brown suggested this method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of function is desired.

Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband," Mrs. Norberta V. Mueller could not be stopped by judge, attorneys or bulliff after she began a recital of her domestic affairs. The husband did not contest the action.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system. Do not check the discharges too suddenly. Do not experiment with a new acid untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 38 years. Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. Millard Co., Ltd., Toronto, Ont.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the hornets. The small, light plane with its spurring machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards." Presumably that gives British air fighters a fine start over all competitors in the armament race. But the presumption limps before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be turning out guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster.—Detroit News.

Praises Missionary Efforts

Doctor Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highgate, South Africa, by Dr. J. R. Moffatt, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be almost unendurable, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense. Women took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has String Attached

Man Must Marry By Christmas 1938 To Inherit

If John Francis Gallagher, of parts unknown, takes unto himself a wife on or before Dec. 25, 1938, and settles down to home life he will receive £100,000 from his aunt, Mrs. R. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Zarah to Acting Mayor J. A. McKeon of Winnipeg. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carbon, Alta, and general delivery, Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequeath all her real and personal property to the church and charity.

Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he salvaged the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

When you smoke plug tobacco, you can cut any pipeful fresh when you want it—and you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

Automatic Gave Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Trader, with a .45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a Bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oklahoma.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr. Moffatt threw up his hands. "I am," he said with determination, "taking it to the nearest police station."

Fixed Price For Tobacco Growers

Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario flue cured tobacco growers are now practically assured for 1934 a price based on 27¢ per lb. for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27¢ average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated. The census of 1931 gave India a population of 353 millions or an increase since 1921 of just under 34 millions. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesmen.

A Miracle Of Speed

Nineteen Girls In London Factory Make Shift In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another button-holes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

"Minnow" submarines weighing only 12 tons and measuring 26 ft. in length have been given successful undersea tests in Japan.

Labor Saving Inventions Lead To Freedom From Soul Destroying Toil And Much Routine Work

If science is to be blamed for all the ills that have beset mankind in late years—including soul-shattering war—then science will accept the blame, but it will retort, science has given man control over nature, before he has gained control of himself.

Sir James Jeans, eminent physicist, stepped out of the field in which he is one of the world's foremost leaders, to speak on behalf of science at large, when he delivered the presidential address at the British association gathering in Aberdeen.

No doubt, said Sir James, a large part of economic depression and unemployment results from wars, national rivalries, tariff barriers, and other causes which had nothing to do with science. But a residue must be traced to scientific research, which produced labor-saving devices which in times of depression were only too likely to be welcomed as wage-saving devices, and to put men out of work.

Science gave rich gifts to the community; labor-saving inventions which displace labor, more fundamental discoveries which may ultimately lead to new trades and new popular demands providing employment for vast armies of labor. The former led to emancipation from soul-destroying toil and routine work, to greater leisure; the latter to the comfort and pleasure, health and wealth of the community.

"If a perfect balance could be maintained between the two, there would be employment for all, with a continual increase in the comfort and dignity of life," he declared.

"But troubles are bound to arise if the balance is not maintained, and a steady flow of labor-saving devices with no accompanying steady flow of new industries cannot but lead to unemployment and chaos in the field of labor.

"Unhappily, no amount of planning can arrange a perfect balance. For as the wind bloweth where it listeth, so no one can control the direction in which science will advance. The investigator in pure science does not know himself whether his researches will result in a labor-saving device or in a new industry.

Crop Testing Plan

To Try To Improve General Quality Of Wheat Grown In The West

During the past three years the Cereal Division of the Dominion Experimental Farms has been interesting itself in a scheme which is known as a "Crop Testing Plan". The main objective of this plan thus far has been to "step up" the general quality of the wheat in the Prairie Provinces by growing in small lots samples collected by elevator agents from farmers' wagons at country elevators with a view, first, to ascertaining the names of those farmers who would be well advised to secure better seed stock, and second, to obtain for these farmers information as to the nearest points at which such stock may be obtained. In 1933 the wheat grown by over 5,000 farmers was checked according to this plan and it was found that over 40 per cent. of these farmers were growing grain which they should not use for seed. This testing plan is being extended on a comprehensive scale in the West this year and is being tried out in certain districts in the East.

Always Very Near

Happiness Can Be Found In World About Us

True happiness can never be founded upon falsehood. The profits of lying are much over-estimated. It pays to be true. At least we shall be at peace with ourselves. Where is happiness? It is to be found in the world all about us, in the stillness of a summer night, in the pride of a good thing done, in the flush of a summer dawn, the following of an ideal, the strong grip of a friend, the perfect heart of a rose, or the wild sweetness of a song. It is always very near.—Danae Neill Melba.

Trans-Atlantic Air Service

Canada Looking Forward To Possibilities Of New Airway

Canada is air-minded and ambitious to have an adequate air system of its own and looks even beyond the transatlantic system the new airway will inaugurate a trans-Atlantic mail-carrying line. The first step will be a 34-day plane and steamship service from Montreal to London. The experience gained in such a service, it is believed, will lead in good time to a trans-Atlantic mail service along one of the three routes airmen think possible, the two shortest of which touch Canada.—Philadelphia Bulletin.

By Ruth Rogers

534
SLIMMING TAILORED TYPE DRESS FOR NOW—THAT WILL SLIP EASILY UNDER COAT LATER

To-day's model is especially designed to slenderize the larger figure. A large woman should not choose too rough effect fabric, but a flat neat design. Rough effects tend to thickening, while small patterned, smoother weaves create crisper lines, and are therefore less bulky.

Crepe marocain in dark ground with broken white diagonal line and with just a glint of metal at intervals in its weave, made the original dress.

Black crepe satin is another smart choice with the collar and yoke of white bengaline.

Here it is to copy it exactly. It's the easiest thing in the world to achieve. The saving in cost will surprise you.

Style No. 534 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Envious Of Dry Areas

B.C. District Claims To Be Wettest Spot In America

Reports of continued heat waves and droughts in eastern and central Canada are read by residents of the district of Henderson Lake, B.C., with a faint feeling of jealousy.

This is the wettest spot in British Columbia and one of the rainiest in the world.

This doubtful title has been held by Henderson Lake, on the west coast of Vancouver Island, just east of Pilepoint Inlet off Barkley Sound for many years.

F. Napier Denison, superintendent of Gonzales meteorological observatory, just released another batch of statistics which explain to those who can read such things that about two-thirds of an inch of rain has fallen every day during the last 12 months. The lake had a total precipitation of 266.26 inches, a little more than its 11-year average of 253.73 inches. The precipitation is made up of 253.72 inches of rain and 12.54 inches of snow, the latter working out to 12.5 inches of water.

All The Same To Her

Mrs. Sylvia Ward, resident of Luxembourg, St. Louis suburb, walked into the county clerk's office with a wolf cub in a box, for which she asked the county's bounty of \$10. The clerk said that the bounty was for dead wolves, so Mrs. Ward stepped out of the courthouse and killed the wolf cub with a hammer.

Navajo Indians can weave blankets so tightly they will hold water.

Heavy thunder can sometimes be heard 60 miles away, over the sea.

Committee Looks Forward With Hope To Time When Empire Emigration Can Be Resumed

Good Roads Association

Minister Of Highways For Prince Edward Island Is Elected President

Hon. G. Shelton Sharp, minister of highways for Prince Edward Island, was elected president of the Canadian Good Roads Association at the annual general meeting of the 21st annual convention held at Murray Bay, Quebec.

Other officers were: Honorary president, Hon. J. E. Perrault, P.C., minister of highways, Quebec.

First vice-president, Hon. A. S. MacMillan, minister of highways, Nova Scotia.

Second vice-president, Hon. Frank M. MacPherson, minister of public works, British Columbia.

Third vice-president, Hon. T. D. McQuesten, minister of highways, Ontario.

Secretary-treasurer, Geo. A. McNamee, Montreal.

A resolution passed urging provincial and municipal authorities to construct sidewalks or footpaths along highways in congested areas. It was decided to memorialize the Dominion government to re-establish the fund for the elimination of gravel crossings.

"Does your wife talk behind your back?"
"No; we don't own a car."

The SNAPSHOT GUILD

School Ahead! Pictures, Too!

Excitement is part of the picture at any football game. It's easily worth the missing of one play to get an over-the-shoulder shot like this!

ABOUT this time of year, school is in everybody's mind; not only students and teachers, but parents, aunts, and uncles.

Here it is that there ever was a snapshotter's paradise, it's school. It may be a one-room school or it may be a great university. Wherever, whatever it may be, it's crammed with unbeatable picture possibilities.

Yet we might as well face the silly fact of the matter—few snapshotters have the most of school's snapshotting opportunities.

Perhaps they are dazzled by the very wealth of the material at hand. More likely, they assume that somebody else is going to take the pictures. And that's a fatal mistake.

For nobody else can see things as you see them. And it's what you see that means most to you—and to the folks at home, now or years from now.

The question, then, is how to make the most of school's picture possibilities. A little planning will do the trick.

First, about the right camera for school. Any camera will do, providing it is clean and in good order and uses a size of film that is easily available anywhere. If you have a fast lens and a fast shutter, you'll have an advantage in taking shots at sporting events, but such a camera is not at all essential. With a little care you can make even the simplest box camera turn out entirely satisfactory pictures.

Then, how can snapshotting be planned? All of it, of course, cannot be planned, but many of the most important shots can be. Why not start out a scenario, Hollywood fashion?

And in less exciting moments it is still a good idea to avoid "posed" pictures as much as possible. People standing up in a stiff line, gazing intently at the camera, simply don't look comfortable, that's all. Catch them at leisure moments, as they perch on the school steps or linger on the lawn.

A really good collection of school pictures is hard to find, as any school year-book editor will tell you. Yet there's nothing much easier to take, and few snapshots increase in value, year after year, as rarely as those taken at school.

JOHN VAN GUILDER

To Canada for ten pounds—or \$50

—is one of the aims of the British committee which has been driving into the question of emigration again.

The committee further recommended extension to include the rail rate in three areas, namely:

\$10 to Montreal and east of Montreal; \$12 to Winnipeg and east of Winnipeg to Montreal; \$14 to west of Winnipeg.

The present full ocean rate to Quebec is \$17 and five shillings.

The committee proposed the cost of the reduced rate should be equitably shared between the United Kingdom and the Dominion governments, and, or, any private organization concerned.

In no case should the United Kingdom's share exceed 50 per cent., it was added.

The report generally looked forward with hope to the time when empire migration can resume its normal course, but it frankly recognized that with the present situation and the prices for agricultural produce obtaining, land settlement for the time being on any large scale is out of the question.

Migrants if they are to live must be able to say what they produce in order to buy what they need. "The condition of the market for most agricultural commodities at the moment is, however, such that even a comparatively slight additional production might well bring the level of prices below even their present unremunerative point, and thereby bring disaster to a far larger number of persons than the settlers themselves," said the report. "For these reasons we should regard the encouragement of any considerable scheme of migration at the present time as out of the question."

The report commented "it would appear to follow that the United Kingdom government can give no greater or more direct stimulus to emigration than by assisting to create increased markets in this country or elsewhere for the Dominion producer, thereby breaking the vicious circle whereby low returns to the producer and the low purchasing power of this country result from and are caused by one another."

Under the best conditions, the report held, group settlement could not account for more than 10,000 settlers a year at a cost of \$1,000 per settler, whereas settlement by "infiltration" had in the past accounted for 150,000 to 200,000 yearly at a cost of \$75 per person. The committee thus generally found against the group system.

On deportation, the report observed: "The migrant should in our opinion be liable to deportation only within a period, say three years, after his arrival, and within that period deportation should only take place where the settler becomes a public charge for reasons personal to himself, not for reasons applicable to the whole community in which he settled."

"As regards persons who become public charges from physical causes, we would suggest that where such causes arise from accident or illness contracted after arrival, deportation should in no case take place except at the request of the person concerned."

Every endeavor should be made to arrange with the Dominion government to extend the nomination system to cover all classes of emigrants proceeding to Canada, the report said. The "boarding-out" system for children should be resumed under defined safeguards.

Workers Could End War

Refusal of the workers to obey the call of the war lords of any country is the only way to frustrate war, John Macpherson, of London, England, told the Trades and Labor Congress of Canada at their convention at Toronto. All wars are capitalist wars, he said, and whether it is the country of the victor or the vanquished the workers suffer on every occasion.

Lettuce requires 1,000 pounds of water to produce one pound of dry material.

WORLD HAPPENINGS BRIEFLY TOLD

Col. H. E. Boak, Royal Canadian Artillery, will be transferred to Regina as district officer commanding military district No. 12, with the rank of brigadier, it was announced at the department of national defence.

Traffic earnings of the Canadian Pacific Railway Company for the week ended Sept. 1 totalled \$2,942,000, as compared with \$2,454,000 in the corresponding period last year, an increase of \$488,000.

Jeffrey Arnott, assistant purchasing agent of the Canadian Pacific Railway, has been promoted to the post of assistant purchasing agent with headquarters at Vancouver, B. C. W. Roberts, general purchasing agent, Montreal, announced.

The cost of living in England increased by one per cent. during August, the Labor Ministry Gazette stated. Taking July, 1914, as the average, the cost of living index was 143 per cent. on September 1 compared with 142 on August 1. The index stood at 141 in September, 1913.

Full freedom for civil servants to participate in politics, even to the extent of being a candidate in the federal, provincial or municipal arena, through leave of absence without pay, will be sought during the coming session of parliament by the Amalgamated Civil Servants of Canada.

Grave fears as to the survival of the French-Canadian race as a distinct entity on Canadian soil are felt by Mayor Camille Houde, of Montreal. Speaking at a ceremony to commemorate the arrival in Canada of Jacques Cartier, Mayor Houde questioned the likelihood of the race's survival.

The weekly illustrated paper, "Canada," published in London for the past 27 years, is being merged with another weekly, the "Canadian Gazette." The editor and founder of the former publication, Walter Levey, closes 37 years of prominent association with Canadian news work in London.

Little Journeys In Science

GOLD FROM THE SEA
(By Gordon H. Guest, M.A.)

Science has shown that there is gold in the sea, but the authorities on this subject are in dispute as to the quantity. Figures given indicate that there are about 700 ounces of the precious metal for each of the two billion inhabitants of the earth, which would amount to \$24,500 per person if gold is valued at \$35 per ounce.

Is it any wonder then, that ever since chemistry became an exact science, plans have been proposed to mine this wealth from the sea? One famous scientist lured by the idea was the late Dr. Fritz Haber, who was awarded the Nobel prize for his method of producing ammonia gas from the air. He found such small amounts in sea water that he concluded the idea was impractical. In his opinion there is more gold in the living organisms of the sea than there is in the sea water.

Recent developments seem to indicate that the chemist of the next decade may be able to extract gold from sea water commercially. This is based upon the fact that a plant has been built in the United States for the extraction of bromine from the ocean.

Bromine is used in the production of ethyl gasoline and hence is in great demand. A few years ago chemists turned to sea water for bromine, even though it contained only seventy parts of bromine in a million of water. Very large quantities of water must be treated—2,000 gallons to obtain a pound of bromine.

It is easy to see why scientists talk so confidently of securing gold from sea water. Bromine is only worth twenty cents a pound whereas gold is valued at about \$35 an ounce. Thus, in spite of the fact that there is much less gold than bromine in sea water, science is hopeful of mining gold on a commercial scale from the ocean. It has been estimated that the gold content of sea water is about \$25,000,000 a cubic mile.

WHAT DOES YOUR HANDWRITING SHOW?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

The increased interest in Grapho-Analysis, the science of character delineation from handwriting, has brought in its train not only a host of converts, but the inevitable sceptic.

One of the most frequent objections is posed by those who ask "How can handwriting show one's character, when we are taught how to write from the same copybook in school?"

The answer to this objection only proves how strongly handwriting does show character. Because if you will study the writing of a single class of students who have learned writing from the same copybook, a few years afterwards, you will not find two who write alike.

Each one writes differently—a different slant, a different pressure, and differing conformations of letters. This shows that, as one grows, one's character changes or strengthens, and one's handwriting changes too.

And, whilst I am discussing objections, I would like to stress that it is not possible to tell a person's age or sex from handwriting. Here and there, a trained grapho-analyst will be able to hazard a guess. There is scientific foundation for it, however, and consequently, no reputable grapho-analyst will attempt it.

I have seen women's writing that looked masculine, and, conversely I have examined the writing of men that looked for all the world like that of a woman. Then again some young people write a mature hand, and on the other hand, I have seen the writing of a man of 50 which seemed to be that of a youth in his teens. We can only get from handwriting what is in it.

There is increasing evidence that certain ailments can be discerned from handwriting. People suffering from heart trouble reflect this condition in their writing.

But grapho-analysis has not yet attained the point where it is possible to analyse ailments from handwriting with entirely scientific accuracy.

These are factors that time and continued research will attain, but character analysis from handwriting is an accomplished fact. And it is also true that vocational guidance can be given by trained grapho-analysts.

If you want to discover your own characteristics and traits, as revealed by your handwriting, take ad-

vantage of the offer made at the foot of this article.

D.N.—You are ruled by your heart—Impulsive; emotional appeals will always draw your sympathy. You are inclined to get hysterical. There is evidence of good powers of concentration. If you get really interested in anything, you find no difficulty in concentrating all your powers on it. You like to move around; to change environment. You are not content to remain passive in a routine way.

F.B.—You have considerable depth of feeling and a desire to get on in the world. There is a sense of balance to be desired. You do not talk too much. You are inclined to be clanish; you do not make friends indiscriminately. Mechanical or engineering work is indicated. These are, of course, merely brief extracts from analyses.

Would you like to know what your

writing tells? And that of your friends? You will be amazed at the revelation disclosed. Send a letter in your normal writing, and state birthdate in each case. Enclose with 10c coin (for each separate specimen) and 3c stamped addressed envelope. Replies will be mailed as soon as possible, but please allow at least two weeks. Address: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man.

"How do you make your living?" "Selling things to men who go fishing."

"That's interesting. How is the fisherman's equipment business?" "I don't know. You see, I run a fish market."

Polished mahogany is likely to fade in strong sunlight.

To Seguard Pedestrians

Beacons To Be Erected In London Streets For This Proposal

"Belisha beacons" will be erected for protection of London pedestrians, another feature of the war on motor accidents. They get their name from Leslie Hore-Belisha, minister of transport, who presided at a conference when it was decided to introduce them.

These are posts seven feet high with a yellow-painted glass globe, unlighted, at the top. They will be put at the crossing-places for pedestrians. In the dark they will reflect headlights a quarter of a mile away.

Women want men to be sturdy oaks—and spruce.

Now...
AIR-CELL BRINGS
AN ENTIRELY NEW
THRILL IN RADIO

"Heard the big ball game this afternoon, Jimmie. You're a real radio fan. No, we haven't electric wiring in our house, but our new Air-Cell radio sounds every bit as good as my cousin's electric set down in the city."

"I used to get into town every time the radio battery ran down. This new radio uses an Air-Cell battery that never needs recharging. I don't mind staying home, though, because our Air-Cell set brings in programs we never heard clearly before."

"That new Air-Cell radio is a wonderful convenience. Our old storage battery was always giving trouble, and half the time we couldn't get the music loud enough. This new set has such an even current that you can hear perfectly all the time."

**EVEREADY
RADIO BATTERIES**

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone without being heard in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household, and so does away entirely with the annoyance, expense and loss of time due to frequent recharging.

Used in conjunction with EVEREADY layer-built "B" Batteries, Air-Cell radios, made by the leading radio set manufacturers, will perform with all the simplicity and reliability of any electric set.

DISCLOSE PLOT TO OVERTHROW SPANISH GOV'T

Madrid.—The government was confident it had disclosed a plot of enormous proportions to overthrow the Spanish republic and establish a "proletarian state" by means of a revolution more bloody than the recent abortive uprising in Austria.

Wholesale murder of public officials, terrorism throughout the country, capture of the government arms manufacturing plants at Oviedo and Trubia and co-operation of Leftists elements of the air force and army had been planned, according to information the government claimed to have obtained.

Premier Ricardo Samper conferred with President Alicia Zamora at his home and an announcement afterward said he was sure the leading plotters, socialists and extremists would be apprehended promptly.

Plans said to have been disclosed included a revolutionary general strike throughout Spain with a carefully-schemed campaign of sabotage and other terrorism.

Squads of machine gunners were to have been designated for transporting in trucks to villages and towns, arousing the proletarian masses and manning the opposition, cutting communications, taking over banks, and assuming complete power.

While civil guards continued searching homes of known extremist leaders for weapons, the premier gave the president the details of the reported conspiracy to set up "a proletarian state" and assured Zamora that the government was prepared for any emergency. All government buildings were guarded.

A truckload of arms captured and documents found in the possession of Francisco Ordóñez, athletic coach at Madrid University, arrested on the university athletic field, gave away the plot, authorities said, and created widespread alarm in government circles.

In the truck seized were 54 cases of machine gun bullets, 60 cases of rifle shells, 300 rifle clips, 34 machine gun belts, five liquid flame machines, and three 14-millimetre guns capable of piercing armor plate.

Huge Wedding Cake

Cake For Royal Couple Will Weigh 800 Pounds

London.—The wedding cake for Prince George and Princess Marina of Greece will be seven feet, eight inches high and will weigh 800 pounds, it was learned as preparations for the wedding went forward.

The cake was ordered from an Edinburgh baking establishment famous for its dainty pastries, and will be one of the largest ever baked in the United Kingdom. It will be necessary to send it to London in several pieces.

Prince George and his fiancée at present are staying at Balmoral castle with the king and queen and Princess Marina's parents.

Creamery Survey In Alberta

For Purpose Of Determining Cost Of Manufacturing Butter

Edmonton.—Beginning in Calgary and in Edmonton, a creamery survey has been launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the Dominion department of agriculture.

The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta and also of the cost of trucking or otherwise delivering cream supplies.

Ship Reaches Craig Harbor

Ottawa.—Canada's 1934 expedition to the posts in the eastern Arctic has reached its most northerly objective, Craig Harbor, on the south coast of Ellesmere Island. Wireless dispatches received in the department of the interior report the E.B. Macphee, carrying the Dominion government post, had reached the far northern post.

W. N. U. 2085

War Is Denounced

Church Of England Opposes Strife As Means Of Settling Disputes

Montreal.—With almost unanimous accord, members of the general synod of the Church of England in Canada, by resolution, denounced war as a means of settling disputes between nations.

The resolution, moved by Rev. Canon W. H. Davidson, Montreal, and seconded by Magistrate J. E. Jones, Toronto, was to accept the principle laid down by the Lambeth conference of the Church of England.

On the principle that Canada should be prepared, one dissenting voice was raised, however, by E. E. Richards, Victoria.

"We must have the best instruments of war available," he said. "There is something worse than war—that is national dishonor." He was met by loud cries of "No," when he declared: "I say that the movers of this resolution are responsible for these men's deaths."

Ven. Archdeacon F. G. Scott, of Quebec, famous war padre, rose to reply to Mr. Richards.

"The last thing General Sir Arthur Currie did," Archdeacon Scott reminded the synod, "was to send a message to the university veterans in Toronto imploring them to start a movement to say that war is a futile test and not a test of the manhood of the world. That came as the general's last order from his death bed."

Communists Shout Insults At Queen Wilhelmina

Three Members Of Parliament Arrested At The Hague

The Hague, Netherlands.—Three Communist members of parliament who shouted insults after Queen Wilhelmina had finished her speech from the throne were arrested and jailed as an infuriated mob tried to get at them.

Police, fearing an outbreak of violence as the temper of the throng about the parliament building grew in hostility, led the men to prison by a secret route.

It was the first time in the history of the Netherlands that members of parliament were arrested in the course of a session. They were released later.

War Danger Lessened

Say Relations Between Japan And Russia Have Improved

Geneva.—Busy with efforts to end war in South America, delegates to the League of Nations, heard that the danger of war in the Far East has lessened.

A day of debate as to the best way of halting the conflict in the Chaco Boreal was lightened by the assertion of Russian spokesmen, made privately, that relations between Japan and Russia have improved.

The Russian sources also stated their belief that both Japan and Germany, recent withdrawal from the league, may be induced to return. Other quarters held similar hopes but declined to forecast their quick realization.

Want Financial Aid

Canadian Fisheries Ask Government Grant For Advertising Purposes

Montreal.—J. C. Eckman, Vancouver, and John Dybbaven, Prince Rupert, B.C., were named vice-presidents of the Canadian Fisheries Association at the 19th annual convention here. Captain Frederick W. Wallace, Montreal, was elected president.

A resolution was adopted urging the Dominion government to vote \$100,000 at the next session of parliament pay the cost for newspaper advertising for the development of Canada's home market for fish. Date of Canada's annual fish week was fixed for October 29 to November 3.

Criticism Of Lottery

New York.—A broadside of criticism was directed at the city's proposals to raise relief funds through new taxes and a municipal lottery. Threat of a legal fight against the lottery was voiced. Mayor F. H. Laguardia admitted a lottery stood about one chance in 10 of being declared legal.

MAY BE CHAIRMAN

It is understood that Sir Thomas White will be the chairman of the Royal Commission on Maritime Rights which has been appointed by the Dominion Government to determine the amount of subsidy which the Maritime Provinces should receive from the Dominion Treasury.

Takes Heavy Toll

Chinese Refugees Tell Of Lives Lost In Flood

Taokow, China.—An unending stream of bedraggled refugees from the region flooded by the Yellow river, their homes and livelihood destroyed, has poured into Taokow.

Government officials were considering a drastic proposal to transfer many of the refugees from the river valley to unsettled territories in Sui-yuan province for rehabilitation.

Their crops destroyed and not knowing what to do, the refugees, wandering aimlessly, tell stories of acute suffering and vast loss of life in the flooded regions of southern Hopei and northern Honan provinces.

It was reported thousands, clustered together like frightened sheep, still occupy high spots in the Yellow river valley. Some still live in tree tops. Rescue work is proceeding slowly. The walled city of Changyuan has become an island, swirling flood water surrounding it.

Rush To Nome

Sending Supplies To Reach Fire Stricken City Before Freeze-Up

Nome, Alaska.—Another rush to Nome was in the making, but it will have little resemblance to the gold rush of 1898 and subsequent years. This time it will be a rush of supplies and a battle of man against time and temperature.

Hoping to rebuild the fire-stricken city in part at least before the Arctic ice shuts out all shipping a few weeks hence, the citizenry laid plans for quick transportation of lumber and other construction materials as well as food and medical supplies.

The Alaska Steamship Company cut its freight rates in half for building material and relief supplies leaving Seattle aboard the steamer Dellwood.

Morro Castle Quiz

Starting Information Is Gleaned From Investigation

New York.—If obeyed, the last order from the bridge to the engine room of the Morro Castle would have left the flaming Ward liner circling about the ocean, a whirl of death and fire, evidence at the United States department of commerce inquiry showed.

The engine crew, however, disobeyed the order and put the engines into neutral.

This testimony was given by an 18-year-old Massachusetts Institute of Technology student, William Wesley Tripp, who was on the tragic voyage from Havana as a cadet engineer.

Details of the death of Captain Robert R. Willmot—who suffered an acute attack of indigestion and died only several hours before he broke out on his liner—were given by Howard Hansen, the fourth officer, who testified he saw no marks of violence on the body.

Rumors have been persistent that the master met foul play. The few charred bones found in the cabin where his body was cremated in the holocaust are now being examined for any evidence of poison.

Against Works Program

Calgary Wants To Spend Federal Grant In Own Way

Calgary.—By a polling of more than five to one, Calgary's property owners turned down a public works program involving expenditure of \$180,000 granted by the Dominion government for that purpose alone.

The plan, in which only one-fifth of the registered voters cast their ballots, coincided with the city's determination to seek leave from the Dominion government to spend the apportionment on civic finance other than public works. Mayor Andrew Davidson visited Edmonton to enlist the backing of the Alberta government in such an arrangement.

The citizens voted 2,839 against and 555 for repairs to the horse show building at the exhibition grounds totalling \$15,000; 2,987 against and 392 for an assembly hall and gymnasium at Western Canada high school to cost \$85,000, and 2,516 against, 782 for a public swimming pool estimated at \$70,000.

Returns Home Via Canada

Vancouver.—Miss Sheila MacDonald, daughter of Premier Ramsay MacDonald, who left London, Sept. 1 for Melbourne via the Suez Canal to attend the Melbourne and Victoria state centenary, will return home to England by way of Canada, according to advices received by the Canadian Pacific Steamship Company here.

No Lives Lost In Fire

Nome, Alaska.—It has been found that the two Eskimos that were reported to have lost their lives in the \$3,000,000 fire of Monday are safe. This means that no lives were lost in the fire.

HAVANA RIOT LINK IN SHIP FIRES?

Havana police have launched an investigation to determine whether a riot of dock workers at the Cuban capital as the liner, Morro Castle, was about to leave on her fragile voyage, may have some connection with the disastrous fire aboard the ship. This photo shows an aftermath of the riot, a young girl, injured as she stood watching the rioting, being lifted into an ambulance.

INSURANCE PLAN IN CANADA FOR THE UNEMPLOYED

Montreal.—Premier R. B. Bennett is preparing to launch an unemployment insurance plan in Canada upon his return from Europe. Ward C. Pitfield announced at the annual general meeting of the Montreal Conservative Association, Inc., at which he was elected president.

Mr. Pitfield, a prominent business man and a leader in the Montreal Conservative field, stated: "The prime minister has under way an unemployment insurance scheme, worked out on an actuarial basis, which I think is the first plan I have ever seen to combat unemployment."

"If the provinces agree, this plan will go into effect," Mr. Pitfield went on. "If they don't I don't see how it possibly can. The provinces have power over civil rights. They have, for instance, power over mortgages."

"I don't see why we can't reduce interest on mortgages from seven to six and eventually to five per cent. The only reason why we cannot do it is that each province has the right to govern its own mortgage legislation."

Circus Lion Caused Panic

Shot By Guards After Escape From Cage During Parade

Richmond, Va.—Breaking open his cage during a circus parade a lion dragged down a horse pulling one of the wagons and then ran at liberty down North boulevard while crowds of spectators fled in panic.

Circus guards shortly after shot the animal to death.

The lion ran several hundred yards down the street after Patrolman John Robert Paul had fired five times at him as he sank his fangs into the horse's neck, taking refuge in the Hankins-Johnson sheet metal works. A circus guard fired four times at the beast. A policeman finished the wounded animal with a pistol bullet.

British Films

Large Sums Being Spent To Produce Better Pictures

London.—Opening of the newly enlarged Twickenham stadium will mark the beginning of a serious effort to produce greater British pictures, it was said here.

Julius Hagen spent \$2,000,000 to equip the Twickenham studios—already one of the largest in England—with modern devices, including underwater film apparatus. Six major films are on the program of the company Hagen stated, and \$5,000,000 will probably be spent in the first year of work.

New Bank Governor

Quebec.—"I was very pleased to note the choice of G. F. Towers as governor of the central bank of Canada," commented Sir Edward R. Peacock, Canadian-born director of the Bank of England, who arrived here. Sir Edward is in Canada to visit his mother in Toronto.

Runless Silk Stocking

Halifax.—A. G. Sandoz, technician at Dalhousie University here, claims he has found what every girl is looking for—a runless silk stocking. He has evolved a solution which, when applied to any textile in the form of a wash or rinse, is supposed to make the fibres stronger and more elastic.

New Bank Notes Smaller

Ottawa.—Canada's new bank notes, issued in about four months. It is reported they will be six inches long and 2½ inches wide. The present notes are 7½ by 3½ inches and United States notes are 6½ by 2½ inches.

Eight Doukhobors Fined

Nelson, B.C.—Eight of eleven Doukhobors arrested for failing to fight forest fires were sentenced to a fine of \$25 or to serve one month's imprisonment. Three who produced doctor's certificates were dismissed. They appeared before Stipendiary Magistrate John Cartmel.

THE NEWS OF STONY

PLAIN AND DISTRICT.

Mr and Mrs Reuben Larson
and family, Edmonton, were
Sunday visitors with Mr and
Mrs L M Larson.

Mr and Mrs H B Bjork
paid a motor visit on Sunday
to friends in the City.

Among Monday's arrivals
in town were: Jac McGillis,
Edmonton; Pearce Bearnam,
Onaway; Upson Downs, Palm
Beach.

While negotiating a poor
stretch of road on the Jasper
Highway on Monday, Mr
Bryan had his car disabled, on
returning from a motor trip
to the City.

Mr Hy Trapp returned to
town on Friday from Cherhill,
where he had been installing a
Delco light plant at the hotel.

The local threshermen are
wondering when they will be
able to resume operations. The
recent snowstorm glued up the
stooks pretty thoroughly.

Stony Plain Junior Hockey
club is making arrangements
to hold a dance in the local
hall in the near future. The
proceeds will be for the pur-
pose of assisting the club with
its financial problems.

Car plate 85076 lost on road
to Golden Spike. Return to H
Enders, Spruce Grove.

BUTTER AND EGGS WANTED
at The Royal Cafe.

Dr. Alexander Leaves.

After a 10 day stay in town
here, Dr Alexander, character
analyst and psychologist, pulled
out today for pastures new.
During his visit here the Doc-
tor entertained a number of
people at the lectures he held.
On Sunday he held three ses-
sions, one of these, in the af-
ternoon, being for men only,
and was very well attended.
Another session which filled
the hall was on Monday night
when the subject discussed
was "Love, Courtship, Mar-
riage, Jealousy." The Doctor
held his last session Wednes-
day night, when a capacity
audience greeted him.

Spruce Grove News.

On Friday, Sept. 21st, with
a membership of 27, Spruce
Grove High School Club held
its first meeting, with a view
to organising for the current
season. Audrey Schwindt, the
retiring president, occupied
the chair until her successor
was elected. With 3 nomina-
tions, the choice of the mem-
bers fell upon Christie Groat,
with Phyllis Sherwin as our
new Secretary-treas. The fi-
nancial statement showed a
small balance to our credit.
A winter road is planned for
the near future. The commodi-
ous new building is fully
capable of housing the in-
creased enrolment.

Has a Good Job Now.

The Hon. Duncan Marshall, at
one time Minister of Agriculture
for Alberta, and who now holds
the same portfolio in Ontario's new
Cabinet, said in a recent address
that within the course of the next
two or three years the Hepburn
government bring in more radical
legislation to help the farmer than
has ever been enacted by any pre-
vious governments. As Premier
Hepburn farm on a fairly large
scale himself, something of a really
radical nature can be expected.

Tried to Pull a Fast One.

In the Ottawa police court re-
cently 3 stockmen were fined
for violation of the Livestock Pedigree
Act by submitting a diagram to
the Records Officer purporting to
show a bull was identified or tat-
toed. One was fined for presenting
the diagram and the others for
causing to present to the Records
an application for registration and
transfer of the bull.

Skeet SHOOTING

2. WHY YOU SHOULD START A CLUB

SKEET was originally designed and
intended to give a pleasing and
informal variety of practice for field
shooting by means of clay targets and
traps, but owing to its unforeseen and
consistent popularity, it has gradually
developed until now it has become an
established sport in itself. Men and
women play it regularly who never
go into the field, and find it sufficient.
Today, there are Skeet leagues and
associations and championship shoots,
and all this must be on account of a
very definite cause. What is it that
has made Skeet so popular with all
classes and types of people? Why are
there already some six hundred clubs
in existence, with more constantly
being formed?

It is very hard to give any kind of
comprehensive answer to so large a
question in a short article. The best
answer of all is, "Try it for yourself,
and then you will see." But until
you have a chance of trying your hand
at it, here are one or two points to
think over.

First, it is quite obvious that every
form of sport has some special attri-
bute of its own, and by reason of this
holds its following. It is also true
it is also true that many sports are
accompanied by handicaps that re-
strict hundreds of enthusiasts from
taking active part. Golf, for instance,
and polo, football, handball, squash,
etc., call for good muscular develop-
ment, and so on, down the line.
Moreover, almost every existing form
of outdoor sport is restricted to a few
months each year. Game shooting,
for instance, is a matter of a short

season, and then the gun must
regretfully be put away until the
following year. In the intervening
months, time hangs heavily and you
get hopelessly out of practice.

Skeet is really unique in that way.
It is a year-round game. Novices with
the gun need not fear repeating their
initial mistakes "at the opening of the
season," for they may have daily
practice, under field conditions, the
consistency of age, sex, or bank
balance (plus or minus). It is a real
family game: father and mother—
or grandfather and grandmother, for
that matter—are no more excluded
from its thrills than are the youngsters.

And it is inexpensive. Little equip-
ment is required, and may be bought
for less than \$100.00, if necessary.
The records of the National Skeet
Shooting Association recently pub-
lished are most interesting facts.
Octogenarian judges repeatedly break
twenty-four birds in a row out of
twenty-five, and a boy of fifteen is a
straight shooter on record to get a
straight.

Here is a thrilling, healthy, inexpen-
sive, outdoor sport for the whole year
round—and it is grand fun!

This is No. 2 of a series of 12 articles on Skeet Shooting. Cut it out. When all
have been clipped, you will have a complete write-up of this sportsman's sport
which is rapidly becoming the vogue across Canada.

NORTH AMERICAN WHEAT SITUATION (Total Annual Average Wheat Production 1200 Million Bushels)

Due to attempts to maintain the price of wheat in 1929 and
1930, the United States and Canada piled up large unsold wheat surpluses
which have persisted to quite recent months. Last year's unfavorable
harvests decreased the surplus in the United States by one hundred
million bushels. This present year's disastrous crops of wheat and coarse
grains in both the U.S.A. Canada and other countries, coupled with
an increasing world demand for wheat for bread purposes, and to a
certain extent for animal feeding, are expected to bring burdensome
surpluses down almost to normal amounts, i.e., the "Carry-over"
existing before 1928. If this proves to be correct then normal prices
for wheat, in relationship to other commodities, should prevail.

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from rheumatism. Demand and get the method doctors prescribe—Aspirin. Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show that Aspirin does not harm the heart. Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures
—ASPIRIN DOES NOT HARM THE HEART—

THE TENDERFOOT

By
GEORGE B. RODNEY

Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

(Now Go On With The Story)

CHAPTER I.—Continued

"What seems to be the trouble?" Keene's tone was anxious.

"Exactly what I asked old Ben. He said that as far as he can see there are two reasons: Carr is mighty well fashioned . . . and the Broken Spur is next to 'em."

"Well, what of it? These days some one's got to be next door."

"Huh. You're damned innocent for the man I know you're not. You're coiled you never heard of rustlin'?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got only about four or five men permanently on his payroll. That means that poverty keeps him from buildin' up a bunch of waddies he could count on to charge hell with a cup of water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. For years Dustin and Goddard have been tryin', by a lawuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens? Old man Carr, crippled, is bein' robbed deaf, dumb and blind to make him sell his place."

"But he can only sell his share. Half of the place is mine."

"Well then . . . Stone hauled himself erect in his chair. . . . 'It looks to me as if one Gerald Keene, before long, will find himself partner to two crooks. If old man Carr is right. Don't you see? Old man Carr will have to sell his half of the Hour-glass to these men Dustin and

Goddard to stand square with the world. . . .

"Does your friend Lyon say these men Dustin and Goddard are two crooks?"

"He didn't have to say so. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook. Why?"

"Well, . . . I told old man Burwell I was goin' to run down to the Hour-glass and have a look at the place. If I go as the half-owner I'll learn exactly nothin' if there's any crooked work goin' on. I'm thinkin' I'll be for me to go down there with a letter of introduction from Gerald Keene, the half-owner of the Hour-glass, to old man Carr. To get me a job down there and see for myself what's goin' on."

"Huh. Gerald Keene'll learn nothin' but good on Gerald Keene's ranch," said Stone grimly.

"That's so. I can't go to the Broken Spur because if Dustin and Goddard are really crooked, they'll not be hirin' any strangers on the ranch. If things are as crooked as men say the Hour-glass'll be the place to learn about it. My plan's the best. I'll go down there with a letter from Gerald Keene and you stay here till you hear from me. I'll get me a job."

"Huh! What kind of a job! A qualified cowpuncher'll be under suspicion the minute he hits the place. Why would a qualified workman take on with a busted ranch when there are others better able to pay him what he's worth? You can't get a job."

Keene slapped him on the shoulder. "You're on. I can't. But I'll go as a tenderfoot. I'll take a letter of introduction to old man Carr. I'll be Duro Stone lookin' for a job to learn the cow business. You know every druggist in the East is turnin' out amateur cow-punchers. I'll be one."

Stone laughed in spite of himself. "I know the type. Druggist cow-punchers! Nickel plated gun or bearkin' chaps! Bought straight from Montgomery-Ward. Shucks, man! You can't do it. You can't fool anybody who's ever forked a cayuse. Your walk; your color; the way you ride. . . . Nothin' doin'."

"I'll show you. Let me at that telephone till I order some stuff."

In five minutes he had sent an order crackling across the wire.

"To be delivered in twenty minutes sharp," he said.

In a half-hour it was there and a grinning boy pounced the receipt.

Keene thrust the boy into the hall, untied the package and turned to Stone.

"You damned old Doubting Thomas," he said. "I'll show you! Wait."

He was gone like a whirlwind. A half-hour later the inner door opened and a new figure stood in the doorway. Newness overlay all his gar-

ments. His stitched boots wrinkled about the ankles and his red-and-green shirt fairly creaked in its creases. His white goshawk chaps had evidently been combed and newly brushed and a nickel-plated six gun showed three freshly filed cuts across its butt whereat both men laughed mightily. Stone roared with laughter and Keene raised himself on his toes and studied his reflection in the long glass.

"I'm goin' down to the Hour-glass to get me a job tuckin' cows and calves into this little bed. I'm goin' to learn all there is to be learned about cows an' their ways. I'm not Gerald Keene. I'm Duro Stone who used to sell papers on the Rock Island route. I always did want to be a cow-puncher. Will I do?"

"God knows what you'll do," quoth Stone between grins. "But if you find out what the trouble is at the Hour-glass or the Broken Spur, your wire for one Gerald Keene. That's me! I'll help you chase the hen off the nest."

"Wait . . . Keene came back from the closet with a bottle and glasses. "Here's the health of Keene an' Stone. . . . I'll wire if I need you."

"And when I hear," said Duro Stone, left behind, "I'll sure come a-runnin'."

"You may need to," said Keene soberly. "I hope not but I'm afraid."

"All right, Old Timer. To the health of the new Duro Stone."

CHAPTER II.

"There he comes now! That's old Dad Kane as sure as shootin'!"

"Sam Dustin, half-owner of the Broken Spur ranch, jerked a finger to the west and Spike Goddard, his partner, rose alighted and quitted into the dust-bath on the range.

"You're a damned fool ever to have grubstaked that old fool Dad Kane," he said explosively. "It's all your doin', too. Three hundred dollars plumb throwed away."

His words carried a sting. They were meant to do just that. Everything that Spike Goddard said or did carried a sting. His red face; his cold blue eyes, his wiry-stiff reddish beard all bespoke combativeness and Dustin felt that sting. He knew that silence under the whip-lash of his tongue would annoy Spike more than any speech.

Dustin and Goddard had owned the Broken Spur for several years and all Crevasse County wondered how they made it pay. That they did make money was clear but none knew how they did it. Old Sam Peters, the decrepit old cashier at the only bank in Seco, could have told them but there were good reasons why Peters should tell nothing that affected Sam Dustin.

"If you'd told me three years ago that you were aimin' to grubstake old Shanny Skin Kane," said Goddard, "I'd have told you it was the ac' of a damn fool."

"I know. An' then you stopped me from takin' up the Bar Circle range lease for grass," snapped Dustin. "That cost us over ten thousand. All because you were scared to take a chance."

This time Spike flushed. A man does not care to be reminded of his tinorous moments that cost him money. He stood by his partner, scowling off into the sunset. Joint owners of the Broken Spur, they were as different as black is from red. Sam Dustin's tall lithe figure, his dark, handsome face, his swarthy teeth made a perfect foil for his partner who was as Jameson, Editor of the Seco Courier said: "As red as a fox and twice as shifty. I wouldn't trust the pair any further'n I'd trust a coyote in a berryard."

The negro cook came out and pounded the supper summons on a big iron triangle that hung on a China-berry tree and the men trooped from the bunk-house to supper but the two partners gave no sign. They continued to stare across the corral at a great red dust-cloud that moved slowly along the distant wire-fence. Under that dust-cloud dim shadows resolved themselves into three packed burros followed by a mousing figure that prodded the rear-most burro with a short goad. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed.

(To Be Continued)

Nurse Was Heroine

Risked Life To Save Hospital From Terrible Disaster

Few stories are more thrilling than that of Sister Thomas, who risked her life to save the main theatre of the Midwestern Hospital from a terrible disaster. One morning the oxygen in a large cylinder caught fire, and a stream of sparks and flames gushed from its mouth. It was a fearful moment. For the condensed oxygen within the cylinder might explode like a bomb any instant and lead to death and destruction all round. Everyone left the theatre, and the last of all to go was Sister Thomas, who had stayed behind long enough to remove the ether out of harm's way and to shut doors in order to minimize the effect of the explosion. Then she did a marvelous thing. She quickly made up her mind to risk burns and possible death in an attempt to save the building. She opened the door, ran across to the cylinder, and turned off the tap which supplied the oxygen to the flame. So fierce was the heat that the steel neck of the valve above the tap had been melted. This cool act of courage saved medical apparatus worth thousands of pounds, and Sister Thomas has been awarded the medal of the Order of the British Empire for gallantry.

THE RHYMING OPTIMIST

By Aline Michaelis

DAWN

Dawn, coming up with its splendor
Blazoned in gold and in blue;
Dawn, with its message of courage,
Old as creation, yet new!

Tasks that are waiting the toiler,
Rest that is waiting the old;
These are the gifts dawn is bringing
Now, as its banners unfold.

Labor and laughter and loving,
Planning and pleasure and pain,
Even with dawn life begins,
Lifting its ringing refrain.

Dawn, with its promise of power
Setting the restless heart free,
Brimming men's thoughts with fresh
ardor.

Hinting of triumphs to be.

Answer to prayers made in anguish,
Symbol of sorrow withdrawn,
After the night and its doubting,
After the dark, comes the dawn!

Canadian-grown root seed compares favorably with the best imported seed in its ability to produce profitable crops.

The Mennonites are members of a religious sect founded by Menno Simons, a Dutch religious reformer born in 1492.

Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort to you. Eat anything you want—it holds plates firmly in place—they positively can't slip or slide. Forms protective coating on sensitive gums. Leaves no colored, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentist. The cost is small—the comfort great. Any druggist.

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 119:70.

Love divine has seen and counted Every tear it caused to fall;
And the storm which Love appointed Was its choicest gift of all.

O that thou couldst dwell in the knowledge and sense of this, even that the Lord behold thy sufferings with an eye of pity, and is able not only to uphold thee under them, but also to do thee good by them. Therefore grieve not at thy lot, be not discontented, look not at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience, can lift up thy head over all, and can cause thy life to grow and be a gain to all. If the Lord God help thee according to the condition of affliction and distress thou wilt have no cause to complain, but will bless His name.—J. Pennington.

Laws Of Physics

Intricate Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKessock at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan, two suspended leaden balls of equal weight. When one ball swinging slowly is struck by one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority on physics points out that if two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the major force. The majority carries.

An electric current always is passing from the atmosphere into the earth.

Once, a Summer Novelty—
Now, a Year-round Necessity

More and more, every day, thrifty housewives for saving new uses for Van-Seal Heavy Waxed Paper and "Centre Pull Packs".

Preserves the freshness and flavor of "left overs", baked goods, meat and fruit. A good substitute for refrigeration in cooler weather.

Your grocer, Druggist, or stationer keeps them.

Appelhof Paper Products Ltd.
Hamilton, Ontario.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel

Your liver's a very small organ, but it certainly can tell your digestion and eliminate organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You must completely correct such a condition by taking small, oil-soluble pills, gradually causing the bowels to move, or you may suffer from constipation, or worse. When they are used, your bowels will be happy—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable, and contain no harmful drugs. Take one or two pills, 25¢ a bottle.

Apples, Crabapples, Plums and Pears.

WHEAT SITUATION IN FRANCE

The average annual wheat production from 1920 to 1931 was 275 million bushels, and the average annual consumption during that period was 323 million bushels. France, therefore, imported approximately 50 million bushels per annum for her own use.
In 1932 and 1933, however, France, in common with most importing European countries, enjoyed very high yields in the acre, and averaged a production of 347 million bushels per annum and so built up a surplus during these two years of 48 million bushels, and did not need to import any net wheat for herself. Due to the high artificial price set by the government in France for wheat and bread, consumption during the last two years has substantially decreased, because bread has been more expensive than other foodstuffs which the housewives could purchase. The French crop for this year is estimated to be 104 million bushels but after making up the deficiency for the decreased consumption, France will still have 33 million bushels available for export to other countries. The government intends to bonus these exports.

Re-opening of Kelly's Hall.

The alterations to Kelly's Hall are about completed and everything is sure to be in readiness for the opening tomorrow night, the 28th. The film to be shown, "Maedchen in Uniform," is sure to be appreciated here. A dance will follow.

Vegetables for Driedout Areas

Vegetables will be transported by the railway companies into dried out areas free of charge, it has been announced. Notices have been sent out, both to municipalities seeking supplies and to organizations in other parts of the province which will either contribute or take charge of collecting supplies.

Brightbank News.

The new threshing outfit of A Propp and R Washburn is doing very good work, when weather permits.

The Stork has visited the O Wagner home, presenting them with a fine girl.

His friends here are pleased to see Mr Groskopf back in the district.

The disappearance of several valuable articles and other mysterious happenings in this neighborhood should be warning to those who are not quite careful enough as to whom they welcome into their homes.

Flocks of geese and cranes have been passing over south recently, and have fallen victims to the good aim of local shooters.

Mr D Sutherland recently purchased a fine milk goat from Mr Sachl, Rabbit Hills district.

Everything is going quite passable in this district, while the opposition is getting re-intrenched.

Will it freeze? will it hail? will it snow?
The thresherman's anxious to know.
And his pain in the neck
Comes from watching each speck
Of cloud up on high from below!

New Federal Marketing Act.

Organisation of live stock and poultry interests in Alberta to assist in marketing of agricultural products under the new federal marketing act will be conducted by Mr E W Brunsden, Calgary. His appointment resulted from the appeals for assistance made to the Dept. of Agriculture by live stock producers who have begun the work of organising their products under the new Act. He will secure all necessary information to assist the producers in their work of organising. He has considerable experience in the marketing of live stock, and is a graduate of the University of Alberta.

Bank Bills to be Smaller and Plentifuler.

The Bank of Canada has decided to issue bills 6" long by 2 7/8" wide. It is understood the chartered bank bills will be of the same size. These dimensions are much smaller than the present Canadian notes. Chartered banks will continue to issue bank notes but will gradually reduce the number until 75 per cent have been withdrawn at the end of ten years, according to the Bank of Canada Act.

Get Your Radio License.

In most cases as far this year radio listeners found operating without the necessary license have been dealt leniently with. Now, Wm Allen, radio inspector for this district, hands out a warning to those who have not yet purchased a radio license, and states that prosecutions will be commenced immediately. Licensees can be had at your local P. O.

'Maedchen In Uniform'

An Unusual Love Story,

—WITH—

**Dorothea Wieck
and Hertha Thiele.**

—AT—

**KELLY'S HALL
FRIDAY,
SEPTEMBER 28.**

"Maedchen in Uniform" is an outstanding achievement. It is the first film to come out of Europe with an entirely feminine cast. It was written and directed, too, by women.

The Girls and Young Women in the cast, over one hundred of them, come from every part of Germany.

Admission, 30c and 15c.

**Dance After Show,
To Celebrate the Opening
of the New Hall.**

On the Side.

Among those who are moving to the City this week, to pursue their studies further, is one young gentleman whose absence will be noticed are long in sporting circles of the younger set. Since ever he was "no side" he has been engaged in any and all sports popular at the time, and in which he was called on to take part. Recently, he has narrowed down his sports activities to one or two lines, in which he has excelled. The young man noted is Mr. H. C. Ostway, who carries with him to his new layout the best wishes of all who know him.

—And now that the very successful season for the local ball players is over and done with, thoughts are turning with the first showing of skicoinc on the ponds to the matter of hockey. In connection with this, the S. P. H. boys are wondering if we really are to have a Junior Hockey Team this season, after the lapse of a year?

—This year is the 40th birthday of the automobile. A local mechanic remarks, some of the ancient crooks chugging around Stony Plain look even older than that!

—When rains hold off, rivers shrink, and crops wither under a blazing sun, the motor car suffers along with everything else. This was true in Great Britain, where the long prevailing drought last season was a serious affliction. So much so that it was suggested a veto be placed on washing motor cars. To this suggestion The Motor Magazine replied "If, in addition, motorists will refrain from adding water to car batteries, we feel the drought problem will be solved."

—There seems to be quite a lot of newspaper comment about the friendly gesture of the United States in returning the mace their soldiers removed from the old Upper Canada Parliament buildings in the war of 1812. They made a good trade—the Canucks gave 'em back Detroit, didn't we?

—The Christian Science folk built a new publishing house in Boston during the years of depression, paid four million dollars cash for it, and never held a garden party or a church supper!

—All paper money in Canada is to be made smaller in size. Even now, it's agreed, most people don't see enough of it.

—People used to think the world was flat. Then it was found to be round. But it's still just a little crooked in spots.

—A United States farmer was recently fined ten dollars for dropping an egg one thousand feet from an aeroplane. He probably was just trying to find out how far farm products really could fall.

—Times must be pretty poor in the printing line in B. C., as the following item sent to The Sun, shows:

WANTED, by young man, position in a printing office, where there's a chance to advance; can sew, press pants, play banjo, milk cows, cut hair, clip horses, run taxi, operate billiard room and shear sheep; attended College 3 years; wages not so much an object as a good home. Address Ph. Barber, Duennut ave., Wunnealberg.

**Pelko
CAPS**

—are made for those men and young men who appreciate the little touch of refinement in head dress.
The most comfortable and most serviceable caps made for golf, motor and all outing occasions, as well as street wear.

T. J. Hardwick, Agent.

The Discoverer's Voice Echoes Down Four Centuries

Four hundred years ago the little group of Redskins and French Voyageurs, who gathered around Jacques Cartier at Gaspé, needed no aid to hear the great discoverer of Canada declare the land the property of "Le Roy de France." This year, however, so great were the crowds of visitors at the commemorative exercises, that a large Northern Electric Public Address System was required that all might hear what was said on that historic site.

Top: In the left foreground beside the cross, and in the circle, are the great horns of the huge Public Address System installed by National Sound for this historic occasion. Right inset is a close-up of the plaque on the cross which was unveiled by the Prime Minister, R. B. Bennett.
Left: The landing of Jacques Cartier at Gaspé in 1534, by Sherrill Scott, which hangs in the Grill Room of the Log Chateau of the Saginay Club.
